

Pursuing Peace via De-Polarization

Marieth Coetzer

Network Science

Nodes: Represent people

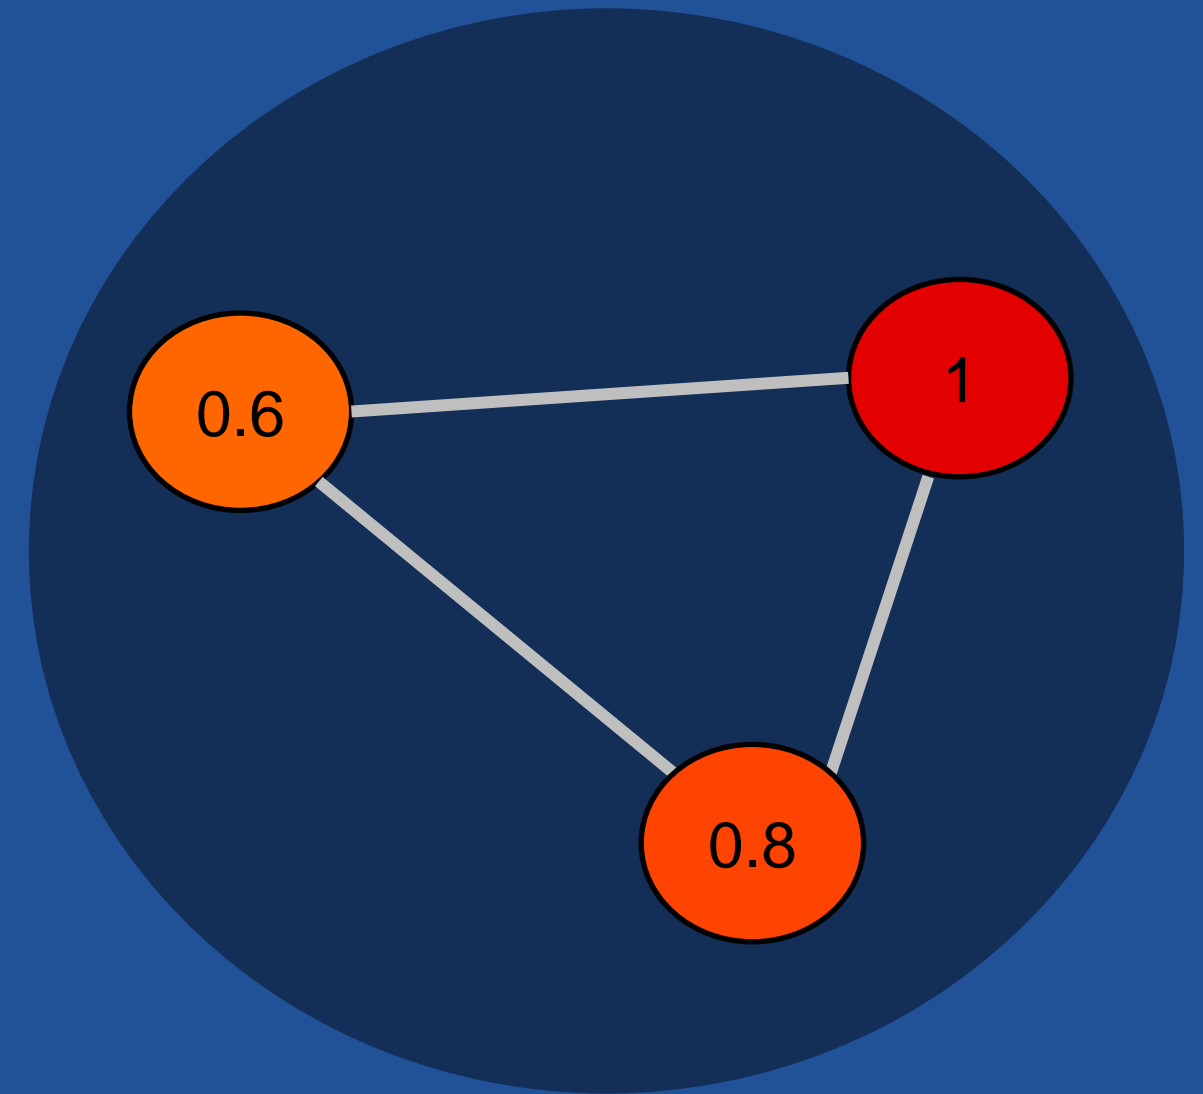

Edges: Represent connections or interactions

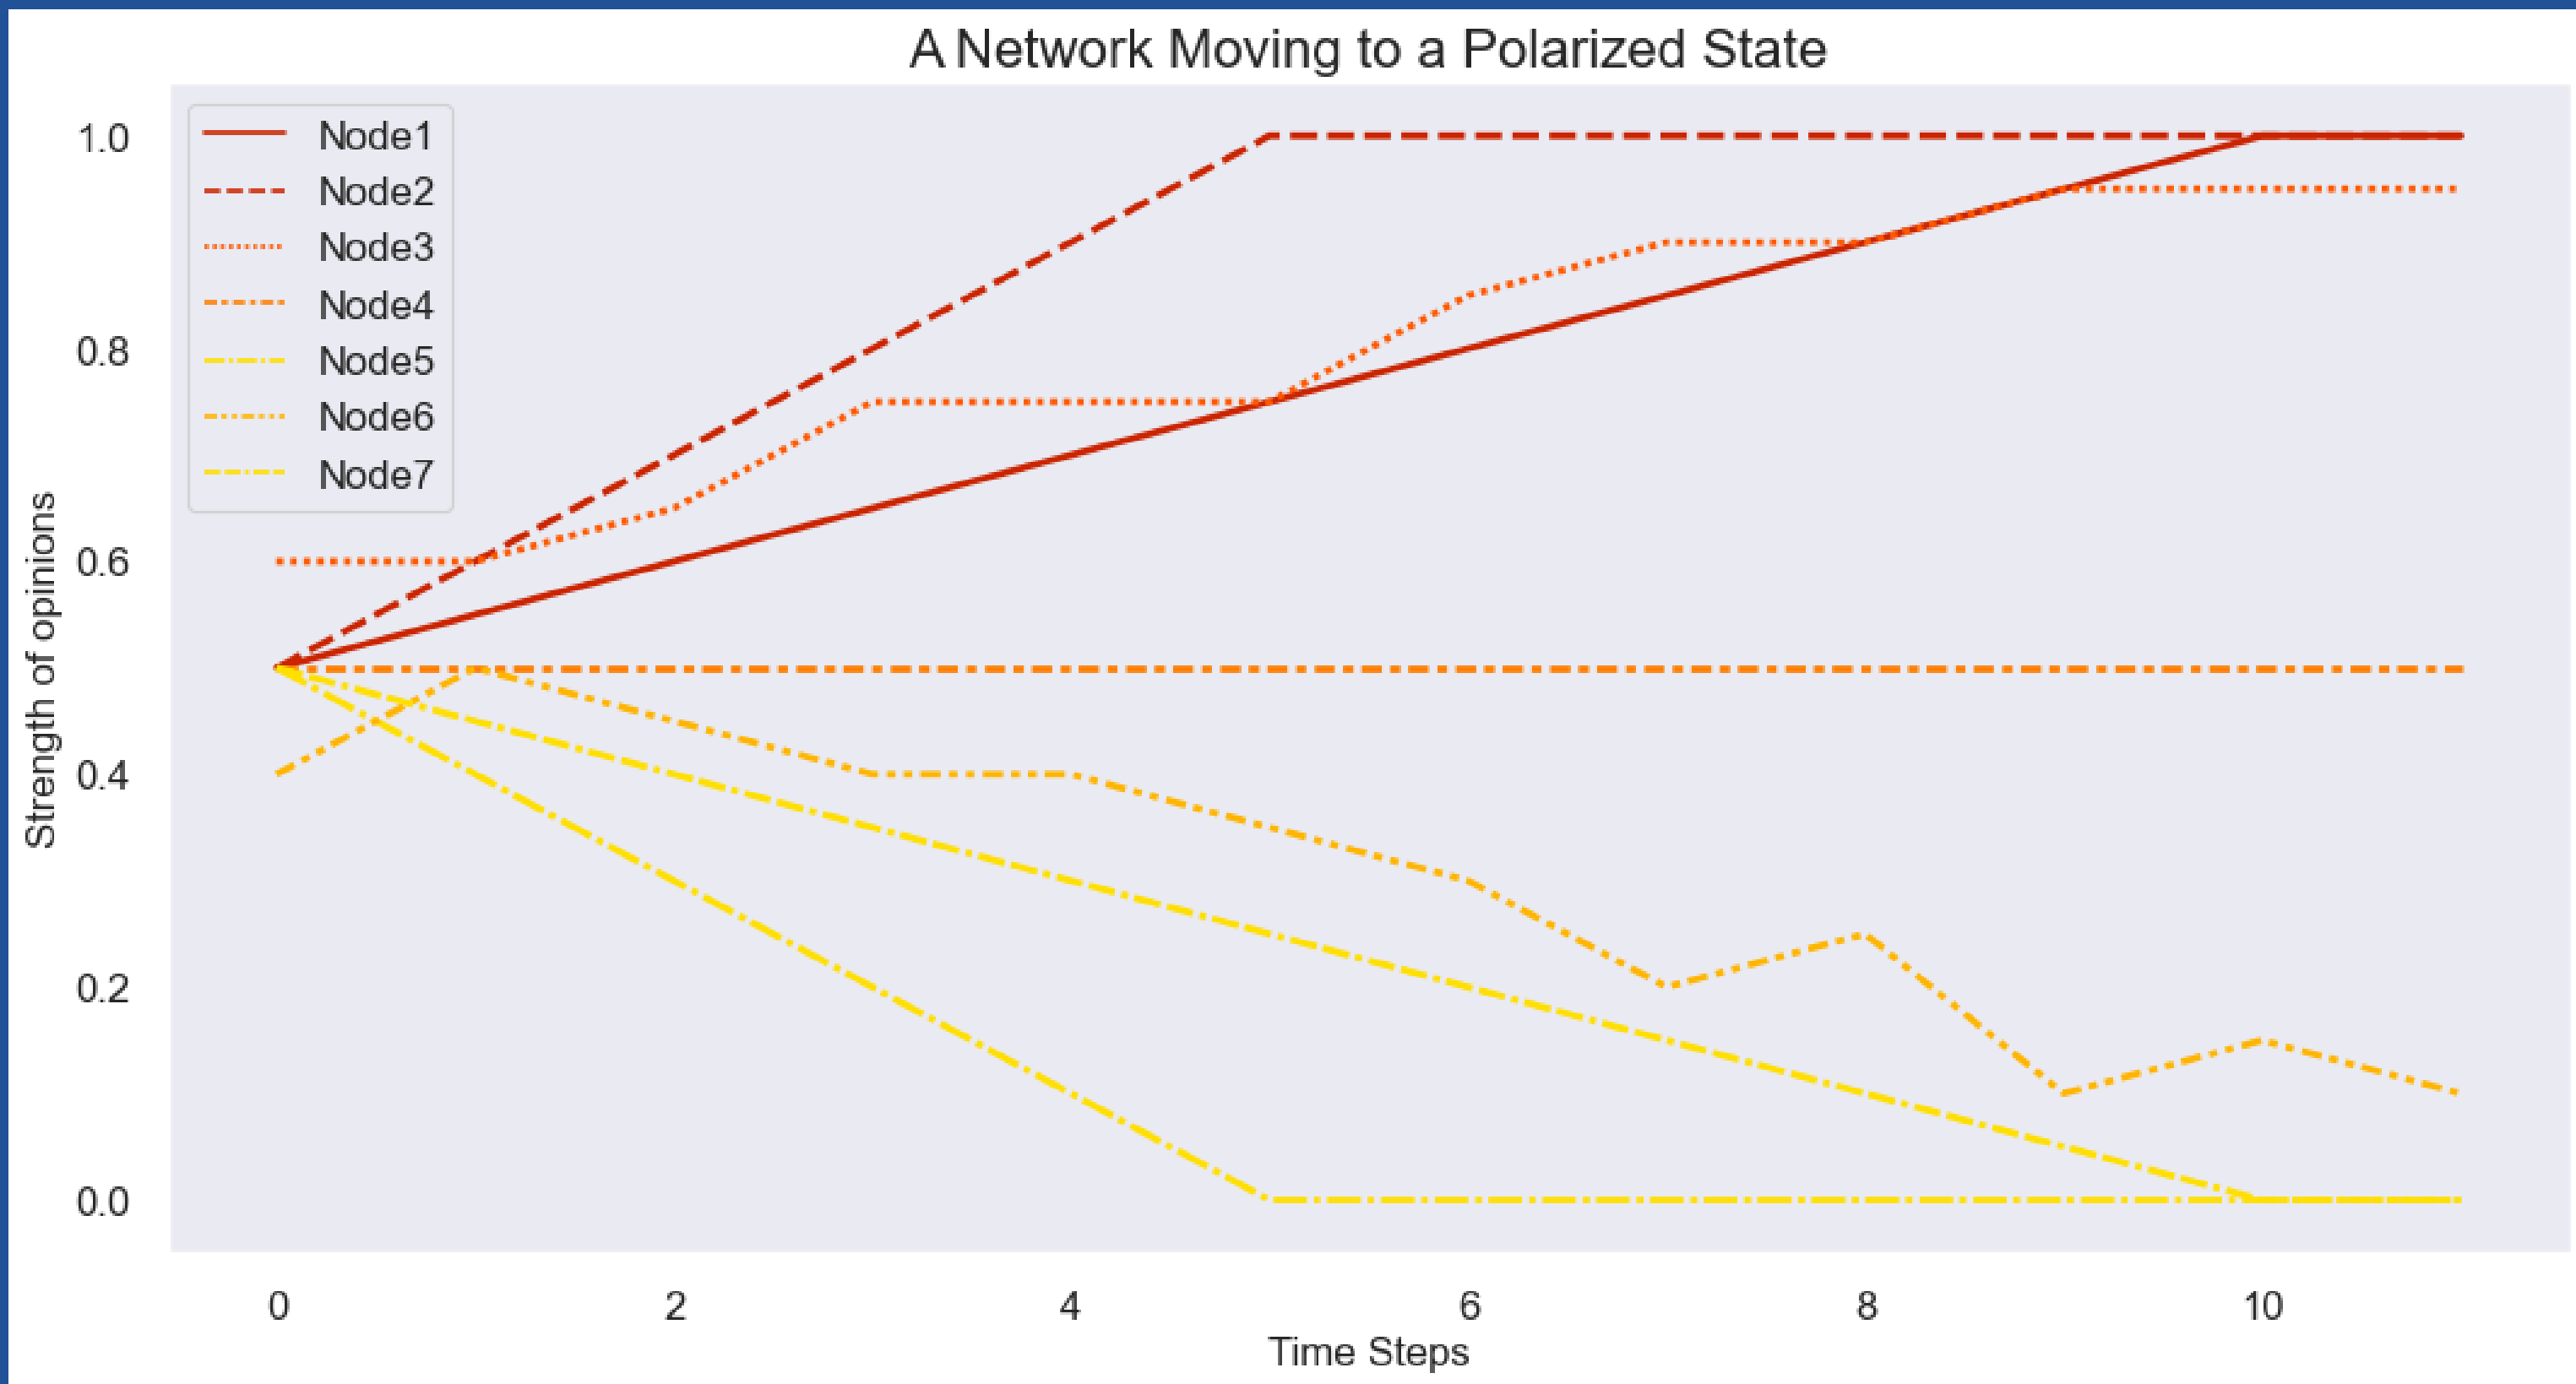

1

Weights: Represent the strength of an opinion

Polarized Network

Line Graph Representation

The background is a dark blue gradient with a complex network of glowing blue lines and nodes. The nodes are small, bright blue dots, and the lines are thin, connecting them in a web-like pattern. The overall effect is a sense of digital connectivity and complexity.

How Do
We Fix This?

The Players

The Zealots

The Susceptible

(everyone else)

The Peacemaker

Bounded-Confidence Model

x : Opinion of node

Δt : Change in time

α : Likelihood of changing opinion

If $(|x_i - x_j| < \varepsilon)$

If the opinion of two nodes are close to each other...

Then

$$x_i(t + \Delta t) = x_i(t) + \alpha(x_j(t) - x_i(t))$$

$$x_j(t + \Delta t) = x_j(t) + \alpha(x_i(t) - x_j(t))$$

...they interact and affect each other's opinions

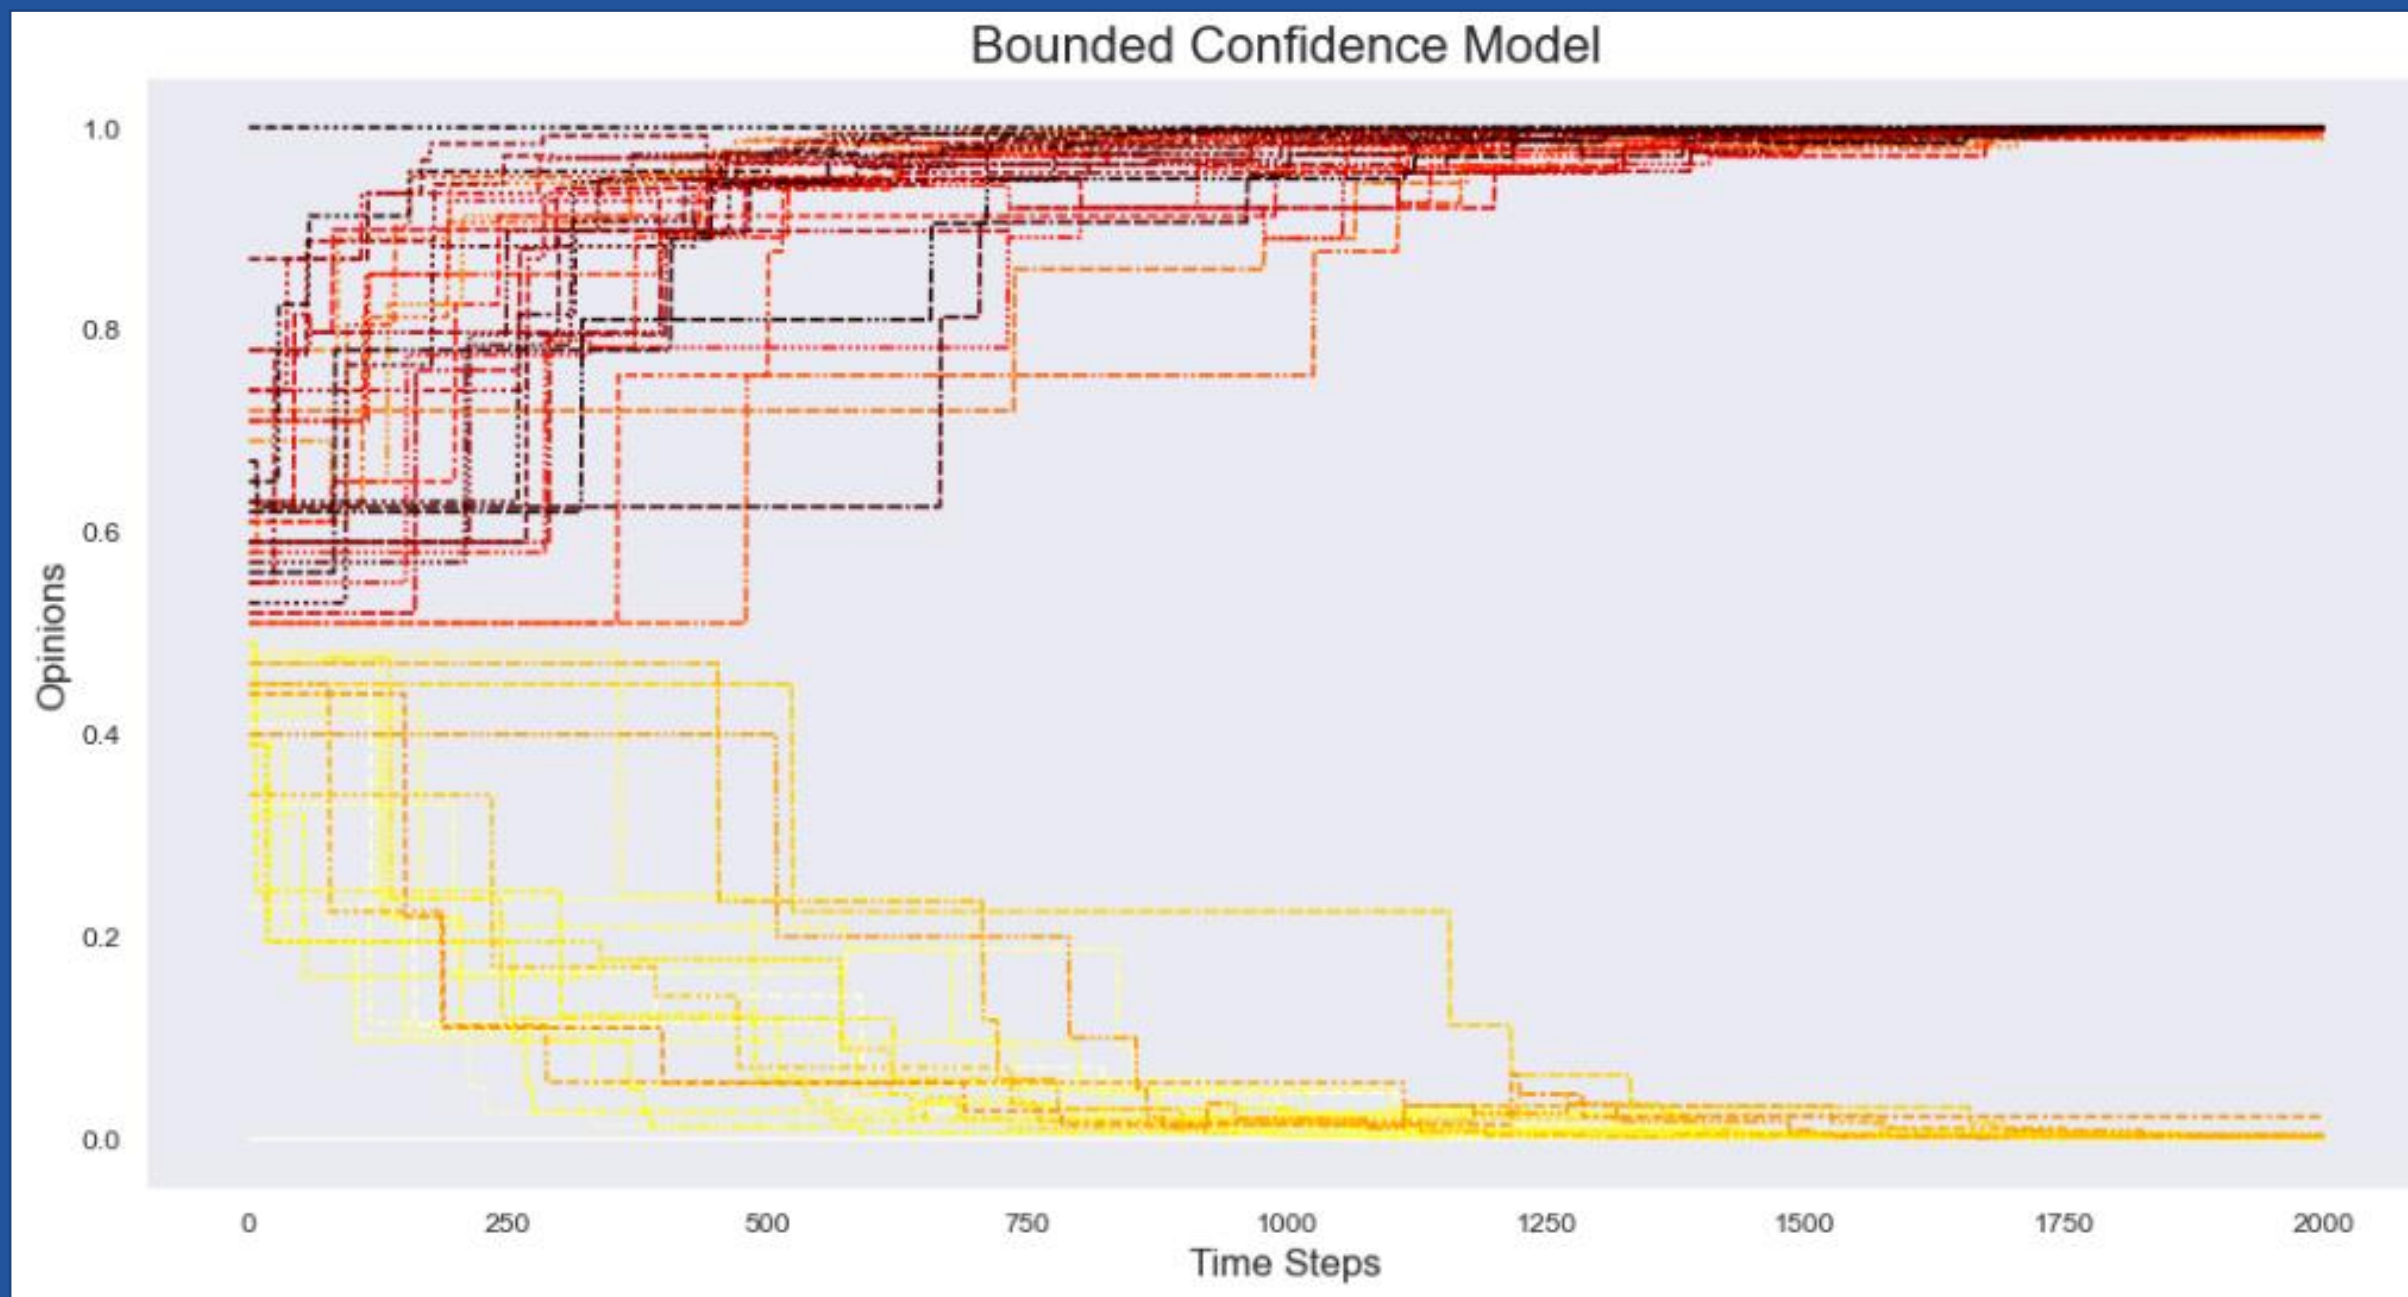

Model Setup

- Zealots and Peacemakers have fixed opinions
- At first, the population has a “Normal” distribution of opinions between 0 and 1
- Polarized means 95% of the population have extreme opinions defined as greater than 0.80 or smaller than 0.20

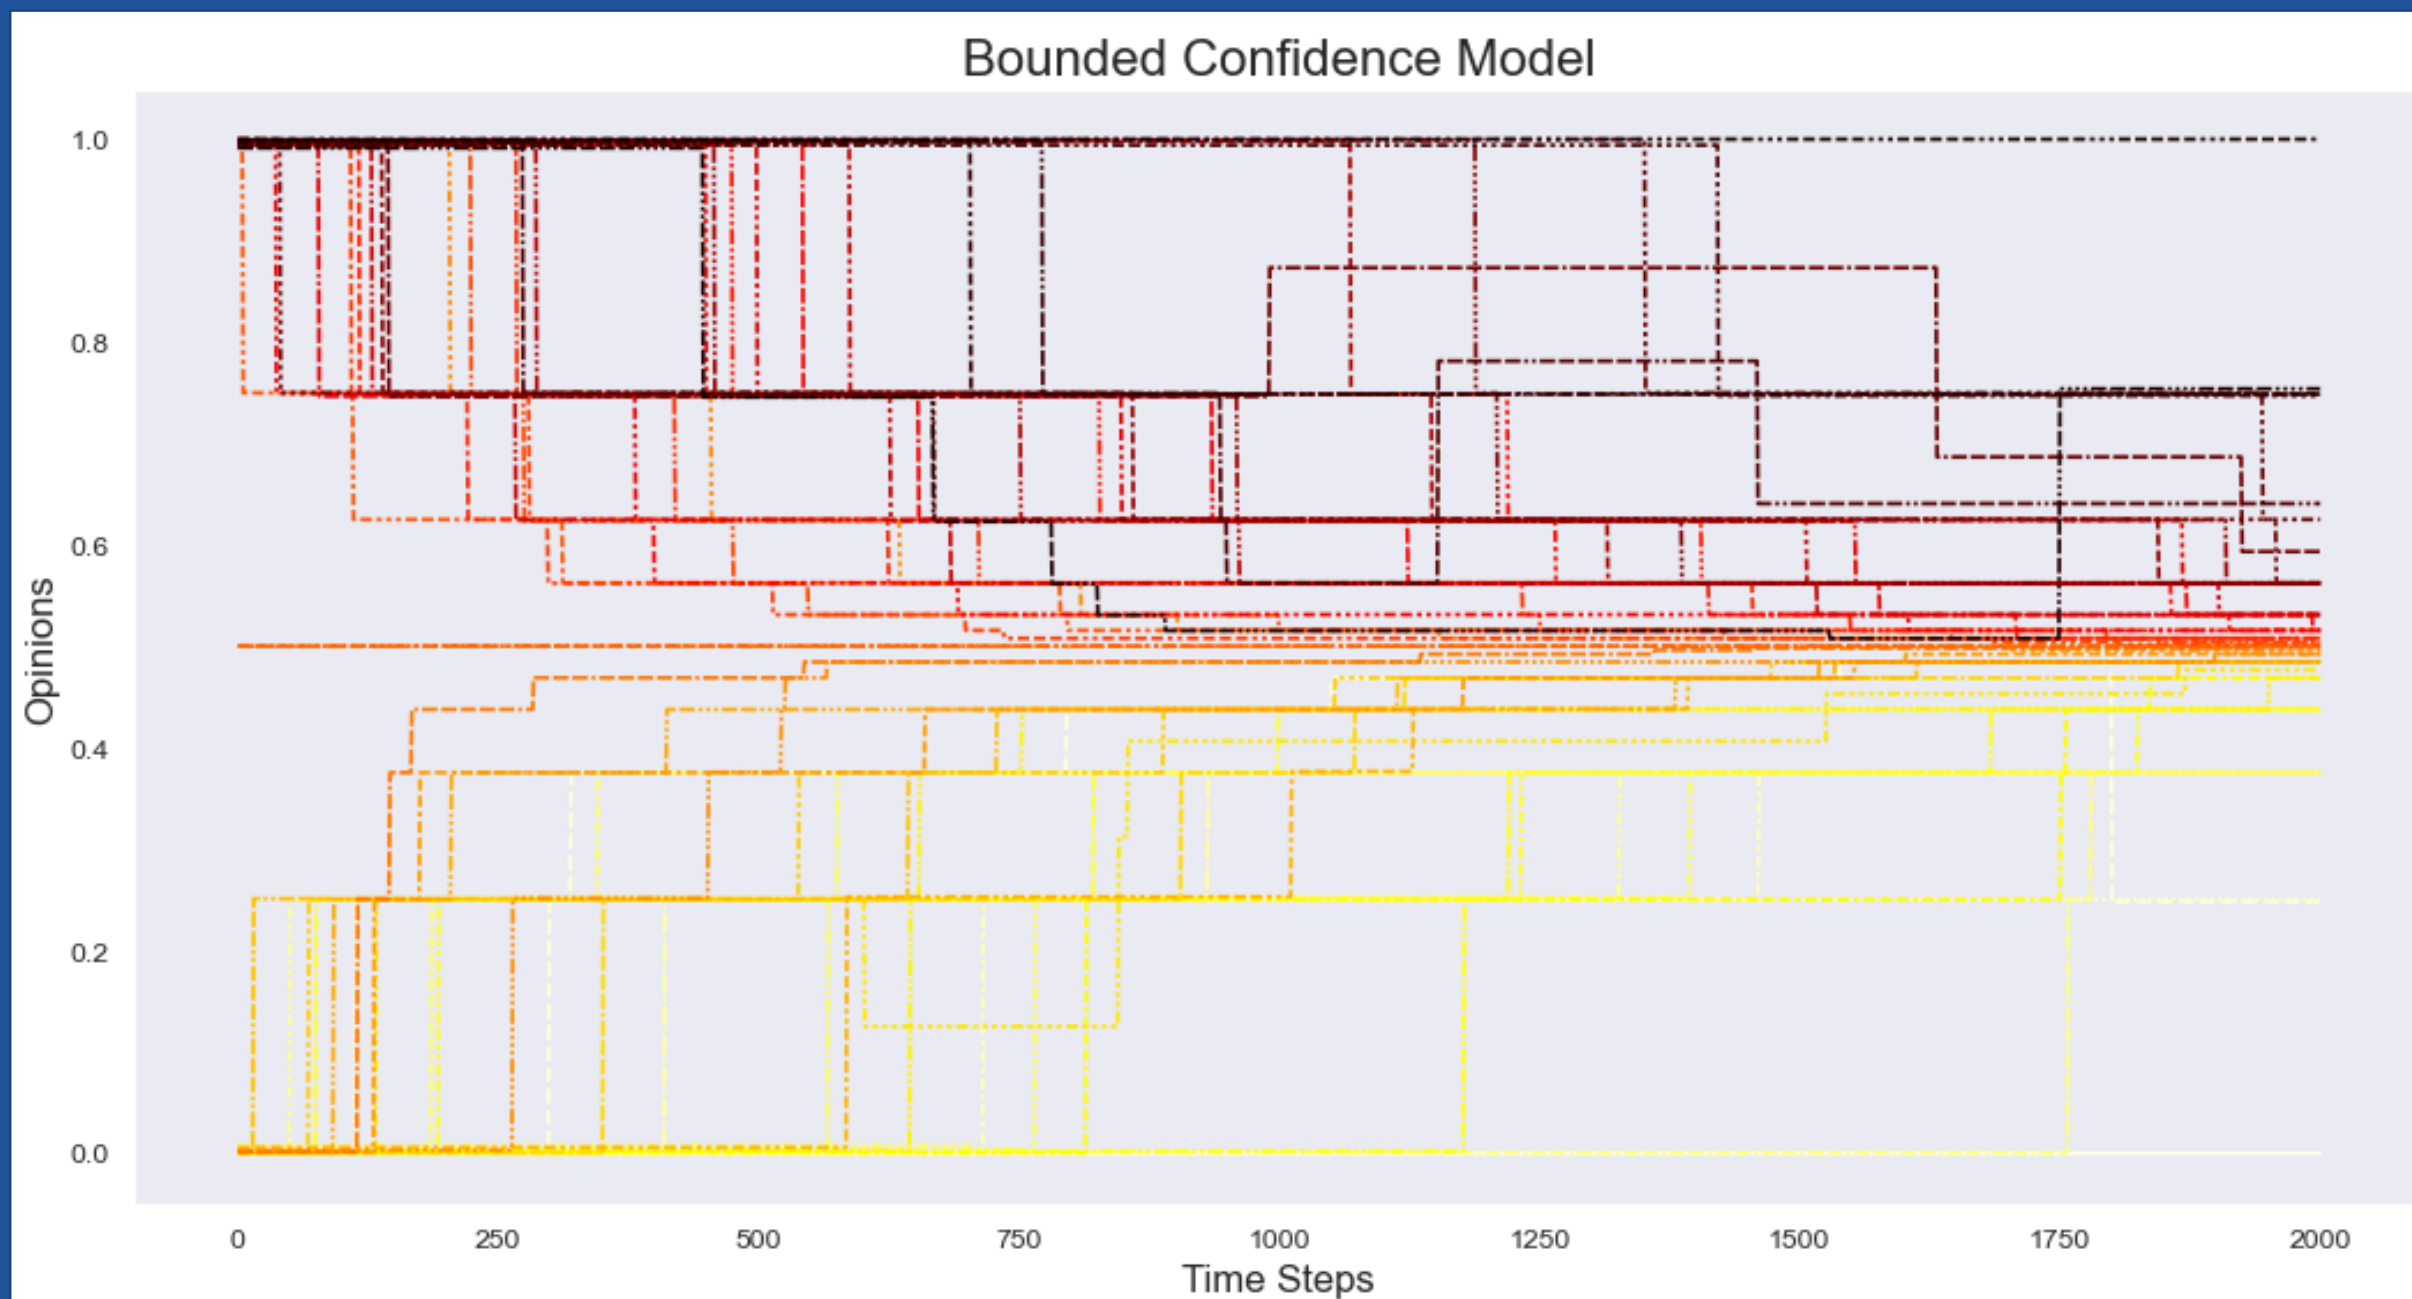

Conditions for Polarization

There are no Peacemakers. Zealots interact 40 more times than Susceptible nodes

Conditions for Depolarization

Peacemakers have to interact 10 more times than Zealots and 400 more times than Susceptible nodes

Preventing Depolarization

Peacemakers prevent depolarization by interacting only 1.5 more times than Zealots and 60 times more than Susceptible nodes

Back to the Real World

Feasibility

“If you spend five minutes with your worst enemy ... you will find that you both have something in common. As you build upon those commonalities, you're forming a relationship and as you build about that relationship, you're forming a friendship.”

Why I, as a black man, attend KKK rallies. | Daryl Davis | TEDxNaperville

Closing Question

“What is a Peacemaker in real life?”

- Express confidence in their opinions
- Interact with those who are vastly different
- Reach out consistently and frequently
